HARDWOOD

The incomparable natural beauty and elegance of solid wood floors beneath one's feet!

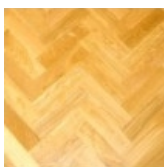

Available in a wide range of exotic Tropical solid woods from across the globe, KVC floors are 100% natural solid wood, so they not only look exquisite, but last longer than other alternatives. The range of woodspecies such as Teak, Oak, Merbau, Maple, Kampas, Tuari etc. Offers a wide spectrum of textures, shades and patterns to match every aesthetic demand and complement every decor. All KVC solid wood floors are factory-finished and ready-to-lay. The tongue and groove provided on all four sides of each floorboard ensures quick, precise and easy installation. The six layers of Polyurethane lacquer coating make the floor comparatively maintenance-free. In addition, KVC floorboards can be made available in various sizes to suite different design options.

Our Flooring Collection

BAMBOO FLOOR

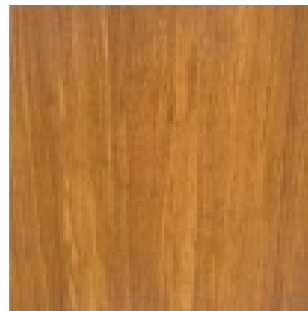

Bamboo is a gift from the nature. Even it can be used like timber, bamboo is actually grass that functions as a single plant, self-propogating as it spreads underground via a network o rhizomes. It is also the symbol of a kind of high-minded ethnics such as elegance, freshness, purity and mercy because of its strength and natural beauty. We use the 5-7 year bamboo as the material to insure the stable & durable quality. Our bamboo flooring is pre-finished with a specially formulated Anti-scratch top coating which has sz coats on the floor's surface including one coat aluminium oxide (anti-abrassive) inside to have high scratch resistance and two coats Anti-Scratch Top Coating outside to prevent the surface of floor excellent. The European produced finish is designed to provide clarity and durability for bamboo flooring.

ARTIFICIAL GRASS

Garden can add beauty to any location. Grass makes a vital element in development of garden. Because of the limitation of resources and climatic conditions, at times it becomes difficult to grow grass at certain places. In such places artificial grass takes place of natural lawn or grass. Artificial grass is surface resembling natural grass but is created using synthetic fibers. Artificial grass is extensively used in sports complexes and arenas. Most importantly we get to see artificial grass is covered stadiums and complexes.

KVC Flooring is a known importer and distributor of artificial grass, lawn artificial grass, pitch artificial grass and garden artificial grass. We supply premium quality artificial grass for the most rough and tough use. Because it is made out of synthetic fibers, it can resist aggressive usage without any requirement of irrigation or pesticide. With a onetime installation cost, artificial grass turns out to be very economical.

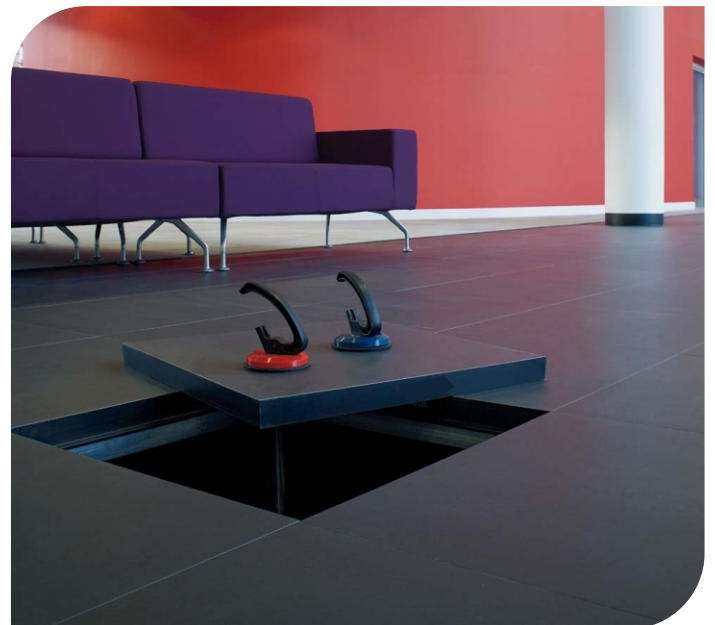

Our Flooring Collection

RAISED ACCESS

RAISED ACCESS FLOOR SYSTEMS

KVC Flooring offers solutions for raised access floor systems combining high quality and aesthetic with functionality and safety, from headquarters corporation offices to government buildings, libraries, casinos, airports, data processing centers, laboratories, and other facilities.

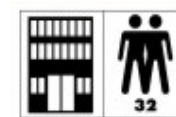

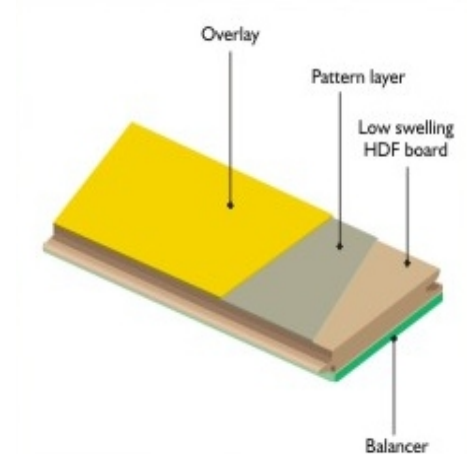

Raised Access Floor Systems are modular, made up of tiles which are supported on a steel structure with different heights to achieve different levels. All raised floor panels are independent and identical which allows the exchange among themselves and the access to the remaining space underneath.
